

We always try to be transparent in our business operations, with the aim of remaining an enterprise that receives a lot of great support.

HighLight

We improve the quality of company information session for individual investors to ensure that they understand our company clearly.

The Public Relations Office was established in April 2013. As part of our IR* activities, it provides our shareholders and investors with IR information including our business environment, financial conditions and future growth strategies.

We will focus on improving the quality of company information session for individual investors. In addition to large cities including Tokyo, Osaka and Nagoya, we will hold company information session throughout Japan to give more opportunities to communicate directly with our investors so that they can gain a clear understanding of our company.

Public Relations
Office

Our company is unfamiliar to end-customers. We will increase the number of company information session and provide more opportunities for our investors to find out more about NGK SPARK PLUG. We intend to make company information session memorable for our stakeholders and investors to create more fans of NGK SPARK PLUG.

Policy of dividends

Returning profits to our shareholders is one of the priorities on our agenda, and we aim to maintain consistent and stable dividend payments. At the same time, returning profits in line with revenues is also important. Currently, we are trying to achieve a consolidated dividend payout ratio of 20% or more, and intend to continue making interim and year-end dividend payments. Our dividend payment plan is based on comprehensive financial strategies that take into consideration the following budgets: R&D expenses (as needed for future growth), capital investment (to expand or streamline the business) and internal reserves (for future investments).

As a result of this policy, the dividend per share during fiscal 2012 was 22 yen.
